Professional Summary

Innovative Full Stack Developer with 4 years of experience building dynamic web and mobile applications. Expertise spans the JavaScript ecosystem (React, Node.js, TypeScript) and PHP. Proven ability to lead development teams, architect ERP solutions, and integrate complex payment gateways like MTN MoMo and Stripe. Dedicated to writing clean, maintainable code and delivering user-centric solutions.

Technical Skills

Languages	JavaScript (ES6+), TypeScript, Python, PHP, SQL, HTML5, CSS3/SCSS
Frontend	React.js, Next.js, Redux Toolkit, Ionic, Flutter, React Native, Tailwind CSS, Material UI, Vite
Backend	Node.js, Express.js, NestJS, Fastify, Prisma, Drizzle ORM, RESTful APIs
Databases	PostgreSQL, MongoDB, MySQL, Redis, Firebase, Supabase
Tools & CMS	Git, GitHub Actions, Docker, Postman, WordPress

Experience

2025–Present — **Lead Full Stack Developer**, *Intech IT Solutions*, Remote/Hybrid
- Leading the end-to-end development of a "Passive Income" platform, enabling users to earn rewards through task completion.
- Managing project documentation lifecycles, ensuring technical clarity for stakeholders and future maintainers.
- Overseeing the delivery of freelance client projects, ranging from corporate websites to custom web applications.
- Optimizing application performance and code quality through regular code reviews.

2024 — **Full Stack Developer**, *OpenTek*
- Served as the Lead Developer for the Laaftzett Construction ERP system.
- Designed and implemented the Finance Module to track expenditures, invoices, and payroll with high accuracy.
- Built the Project Management Module, facilitating real-time resource allocation and timeline tracking for construction projects.
- Collaborated with cross-functional teams to define system requirements and deliverables.

Jun–Aug 2023	**Full Stack Developer**, *Ajousa* ○ Successfully integrated MTN Mobile Money (MoMo) APIs, enabling secure and instant digital payments. ○ Developed robust authentication endpoints for the "Kingstutor" educational platform, ensuring data security. ○ Implemented comprehensive user authorization flows (JWT/OAuth) to protect sensitive user routes.

Key Projects

2024	**Reepls**, *Personal Project* A central platform designed to unite the voices of African creative writers. ○ Built a scalable content management system allowing writers to publish and monetize stories. ○ Implemented social features including commenting, liking, and sharing to foster community engagement.
2024	**Passive Income Platform**, *Intech IT* A web-based platform incentivizing user engagement through task completion. ○ Developed backend logic to track user progress and calculate rewards in real-time. ○ Designed an intuitive dashboard for users to monitor earnings and available tasks.
2023	**Proball Coordination**, *Client Project* A fully functional e-commerce platform built on WordPress. ○ Customized themes and plugins to meet specific branding requirements. ○ Integrated payment gateways and inventory management systems.
2023	**Zitopay Integration** A payment integration module facilitating diverse transaction methods. ○ Unified multiple payment providers into a single API interface for easier consumption by other services.

Education

2019–2023	**B.Eng in Software Engineering**, *University of Buea*, Cameroon, CGPA: 3.31 Second Class Honours

Certifications

2023	**Enterprise Design Thinking Practitioner**, *IBM*
2023	**Product Management Fundamentals**, *Pendo*
